

I am concerned about Air1 being bumped off the air in Jacksonville Florida at 89.5. From what I understand LPFM broadcasters may be able to take over FM translator services such as Air1 in the area. I enjoy Air1 and believe it serves me and the community I live in. The station provides a positive listening environment for kids and adults alike. Losing Air1 would be a terrible hit to all those in the community who enjoy their programming. As a citizen I'm petitioning you to do whatever is necessary not to give Low Power FM stations the right to take over Air1's spot on the Jacksonville dial.
